

## ROAD PAVEMENT RECONSTRUCTION

**Client:**

**Con-Form Ltd**

**Location:**

**Edinburgh, Scotland, U.K.**

**Machine:**

**Kirpy WX300 Rock Crusher**

**Project:**

**Duplication of A1 highway. In-situ material had a high percentage of oversize dispersed through clay which was limiting the productivity of the soil stabiliser & causing excessive damage to the mixing tynes. Kirpy crusher was used to process material before stabilisation.**

**Result:**

**Very hard basalt rock, 400mm minus infeed, 100% passing 75mm sieve @ 180m<sup>3</sup>/hr production rate. Rock damage to stabilising equipment eliminated.**
