LODDON SHIRE USES BROONS' COMBINATION ROLLERS TO REPAIR FLOOD DAMAGE

Large areas of Loddon Shire Council in North Western Victoria were hit by floods 12 months ago, requiring a significant clean-up and rehabilitation of roads throughout the Shire area.

Loddon already had two Broons eCombi Rollers that they have been using for road re-sheeting, light road construction and maintenance, but the decision was made to accelerate the restoration work by bringing forward the next three year’s planned capital replacement program.

In order to help achieve their goals the Shire ordered, and recently took delivery of, two new Broons Combination Rollers, which have become an integral part of the restoration program.

Stephen Phillips, Manager Works for Loddon Shire said that there had been a substantial increase in work, and all the machines “have been flat out” and are “performing really well”.

“We are really happy with their work, and the operators like the way they are easily manoeuvred,” he said.

The Broons BH-1830 Combination Roller can be configured a number of different ways to suit the customer’s needs. It can be a combination of Smooth Drum and Multi-Tyre (BH-1830), Grid Roll Drum and Multi-Tyre (BH-1830GR) or just a Multi-Tyre Roller (BH-1830M).

With a rolling width of 1830mm and a gross weight of up to 14 tonnes the Broons Combination Roller is easy to use and simple to change from tyres to drum and back again. It’s a straightforward operation that can be done from the ease of the operator’s seat on some models of tractor.

Broons experienced technical staff can give you details on hiring or buying a machine and can be contacted on (08) 8268 1988.
