**Client:** Vibro Foundations / Soletanche Bachy

**Location:** Dubai Maritime City, Dubai, UAE

**Machine(s) used:** BH-1300 (8t module)

**Scope of Project:** Dubai Maritime City is planned to become an iconic hub for the maritime industry in the Middle East & includes office/residential towers & an industrial/port/marina precinct.

**Details of Project:** Impact Rollers were used for surface treatment after vibro compaction across an area of close to 2,300,000m$^2$.

**Performance:** Ongoing testing using CPT proved Impact Rolling consistently achieved the specified density in the top 2-5m of the reclaimed sand fill.
