<tbody>
<tr>
<td>Location:</td>
<td>Dawson Mine, QLD</td>
</tr>
<tr>
<td>Machine(s) used:</td>
<td>BH-1950MS (12t Mine Spec module)</td>
</tr>
<tr>
<td>Scope of Project:</td>
<td>The Dawson Mine produces around 12 Mtpa of coking &amp; thermal Coal for export. Significant expansion of the open cut mine &amp; increase in the haul truck fleet by a further 32 Cat 797 trucks created a need to improve tyre life &amp; cycle times.</td>
</tr>
<tr>
<td>Details of Project:</td>
<td>A Broons BH-1950MS Impact Roller &amp; Case STX280 tow tractor was supplied as a turn key package &amp; has been used to improve the running surface on tip heads, compaction of haul roads &amp; various other civil works.</td>
</tr>
<tr>
<td>Performance:</td>
<td>Targets for reducing tyre damage &amp; improved cycle times are being achieved with the Impact Roller contributing to this.</td>
</tr>
