

Combination Roller

Combination Roller

The Broons Combination Roller has always set the benchmark for towed smooth drum multi-tyre rollers in Australia. Ideal for both road construction and maintenance grading, it is the pride of any fleet.

Designed with Broons' world famous engineering quality, it has gusseted mainframe construction, locking hydraulic drum actuation from the comfort of the cabin. Ballasted up to 13 tonne, and towed by either tractor or grader, it can be easily transported along the highway before being deployed for compaction.

Optional electric over hydraulic disc brakes enhance stopping, while the cabin operated hydraulics reduce OH&S risks for crews and improve productivity. Both a grid drum and multi-tyre configuration make up over 20 available options to customise the roller to your needs. With many early machines approaching 35 years of service, the Broons Combination Roller is the most dependable roller available today with an industry leading *10 Year Structural Warranty*.

Type	Tare weight (kg)	Max Ballast weight (kg)	Number of wheels	Solid filled tyre weight (kg)	Compaction width, roll drum (mm)	Length (mm)	Width (mm)	Height (mm)
BH-1830 Smooth Drum Multi Tyre	7,500	13,170	11	575	1830	6000	2235	1245
BH-1830 GR Grid Drum Multi Tyre	8,000	14,000	11	575	1820	6000	2235	1250

Options

Electric/hydraulic Disc Brakes

Grid Drum

Goose Neck Drawbar

Drum Scraper

36mm Roll Drum Skin

Sign Holder

Heavy Duty Push Bar

Solid Filled Tyres

Tyre Scrapers

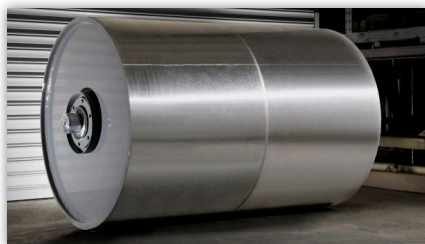

Flashing Light

Fire Extinguisher

Spare Tyre

Machined Drum

Vehicle Tow Hitch

Mono-block Hose Coupling

Swivel Hitch Adaptor
