

Graderoll Duo

Graderoll Duo

The intelligent Broons Graderoll Duo is ideal for patrol grading of unsealed roads. Fitted directly to the grader rippers, it is lowered for compactive pressure from the comfort of the cabin.

Designed to follow the contour of the road, the Graderoll Duo has three independent tyre groups that self adjust to the shape of the pavement. Ideal for shaping the road and creating a perfect crown. Additionally the roller has a cabin operated walking beam which enables the roller to sit left of the grader for shoulder rolling and grader protection in built up verge conditions.

Able to grade and compact with the single operator, the Graderoll Duo is the most efficient and effective way to execute patrol grading of gravel roads. Built to Broons' world leading design and quality standards, and with an industry leading *10 Year Structural Warranty*.

Type	Tare weight (kg)	Solid Fill Tyre weight (kg)	Number of wheels	Static weight per tyre(kg)	Compaction width, tyres (mm)	Length (mm)	Width (mm)	Height (mm)
Graderoll Duo	2,190	625	12	185	2320	2960	2500	1400
