

Graderoll Mono

# Graderoll Mono

The Graderoll Mono is the simplest of Broons' compact grader mounted rollers. A tried and true concept, but brought into the 21st century with our innovative new design and market leading quality. Graderoll Mono is an essential tool for maintenance grading of gravel road infrastructure.

Easily connected to the rippers, the Graderoll's secure coupling system has you rolling within minutes - arrive at site, lower and roll. The 10 compaction tyres can be raised and lowered on the run, whether going forwards or in reverse. A built in toolbox keeps all your tools lockable, while the optional tyre scraper keeps tyres clean. Also available with an optional recovery hitch, tail lights and a lift attachment which allows retraction of the roller for the purpose of ripping the pavement.

Safely controlled from the cabin, the Graderoll Mono is the ultimate patrol grading attachment.

Type	Tare weight (kg)	Number of wheels	Solid filled tyre weight (kg)	Compaction width tyres (mm)	Length (mm)	Width (mm)	Height (mm)
Graderoll Mono	1,950	10	520	2075	1345	2415	974
